*Introducing the first comprehensive reference
to the field of communications*

INTERNATIONAL ENCYCLOPEDIA OF COMMUNICATIONS

ERIK BARNOUW
Editor-in-Chief

GEORGE GERBNER
Chair, Editorial Board

WILBUR SCHRAMM
Consulting Editor

The *International Encyclopedia of Communications* is a comprehensive, authoritative, and up-to-date reference covering all aspects of communications—individual and institutional, cultural and technological, practical and theoretical—in every part of the world. The editors of the *Encyclopedia* define communications as “the study of the many means by which information, ideas, and attitudes pass between individuals, groups and nations, and generations. It focuses on the ways in which culture is transmitted and changes, and on the systems and organizations in these processes.”

Broad in scope and interdisciplinary in its coverage, the *Encyclopedia* contains more than 550 original articles written by an international group of distinguished contributors. Entries are arranged alphabetically for easy access, and there are abundant cross-references as well as an extensive Analytic Index. In addition, each article is followed by a bibliography. The *Encyclopedia* is well-illustrated with 1,200 photographs, line drawings, maps, and tables.

The *International Encyclopedia of Communications* is a work that is destined to become the standard reference for students, scholars, educators, professionals, and general readers, and an essential resource for every library.

Available March 1989 4 volumes: approx. 2,000 pages ISBN: 0-19-504994-2
